Who is Bluewater Energy Services?

Bluewater Energy Services |31,460 followers on LinkedIn. Bluewater specializes in the design, lease, ownership and operation of Floating Production Storage and Offloading (FPSO) vessels; and the design and supply of advanced turret mooring systems and CALM Buoys.

What services does Bluewater provide?

We also provide operational and logistic management and support for offshore Production and Energy Systems. For offshore production and transfer of renewable energy, Bluewater has developed a Floating Wind TLP, a Tidal Energy Converter Platform, Solar Matresses and the Electrical Buoy.

What mooring systems does Bluewater offer?

Bluewater has developed some of the most innovative SPM solutions, including catenary anchor leg mooring (CALM) buoys and tower, internal and external turret mooring systems. Bluewater's tidal energy converter (BlueTEC) is an open-architecture floating support platform suitable for tidal turbines.

What can Bluewater do for You?

For offshore renewable energy production, Bluewater has developed a Floating Wind TLP, a Tidal Energy Converter Platform, Solar Matresses and the E-Buoy. For more information or career opportunities visit Join us at the XX Jornada SLOM in Punta del Este, Uruguay, on September 11-13, 2024!

What is Bluewater FPSO?

This includes solutions for renewable energy as well as continued development of existing energy related solutions to give answer to the continuing, global energy demand. Bluewater owns and operates a fleet of high specification FPSOs designed to operate in the harshest environmental conditions, under the most stringent regulatory regimes.

In 1992, these three units were sold following a strategic decision to pursue higher-specification projects. The Uisge Gorm, Glas Dowr and Bleo Holm were developed for the North Sea. Due to the harsh environment and the strict regulatory requirements applicable to operations in the North Sea, Bluewater developed a reputation for its high engineering, fabrication and operational ...

In 2011, Bluewater completed the conversion of FPSO Glas Dowr at the Sembawang shipyard in Singapore to prepare the FPSO for operations in the Kitan Field. First oil was achieved on 14 October 2011. The Kitan field is located some 500 km off the Australian northwest coast, in an area of the Timor Sea.

Since its foundation in 1978, Bluewater has built a technological lead specialising in design, development, lease and operation of tanker- based production and storage systems, and has become a leading provider of innovative Single ...

Bilfinger Tebodin heeft voor zijn klant Bluewater Energy Services B.V. een European Energy Efficiency Directive (EED) audit uitgevoerd. De EED werd actief in 2012 en onderdeel van deze richtlijn is het uitvoeren van een EED-energieaudit die elke vier jaar vernieuwd moet worden. Omdat we in 2016 een EED-energieaudit voor Bluewater hebben uitgevoerd, vroegen ze ons ...

The Bluewater Jettyless LNG Terminals are an alternative for conventional LNG ports. These SPM systems are installed nearshore to receive and moor LNG Carriers for loading or offloading. LNG is then transferred between the Carrier and the LNG storage onshore, either directly or by utilising a Floating Storage Unit (FSU) for temporary storage ...

Since its foundation in 1978, Bluewater has built a technological lead specialising in design, development, lease and operation of tanker- based production and storage systems, and has become a leading provider of innovative Single Point Mooring systems.

Since its foundation in 1978, Bluewater has built a technological lead specialising in design, development, lease and operation of tanker- based production and storage systems, and has become a leading provider of innovative Single Point Mooring systems. ... It is currently on contract to Hurricane Energy plc for the early production system ...
