Solarthon Lithium 10KWH/15.36KWH inverter with energy storage system Battery Home Energy Storage System . Lithium batteries can be charged during the day and provide energy during the night hours when the solar panels are not working. They have a larger capacity and can store more energy than other types of batteries.

Power inverters have the ability of inductive load or capacitive load, while the load power factor of sine wave inverters ranges from 0.7 to 0.9 with a rated value of 0.9. When the load power is fixed, if the power factor of the inverter is low, the required capacity of the power inverter will increase. On the one hand, the cost will increase.
