Can Botswana meet its energy needs in 2021?

According to the International Renewable Energy Agency (IRENA), Botswana could meet 15% of its energy needs in 2030 from its indigenous solar, wind, and bioenergy resources. (2021 evaluation)

Is Dolphin Energy a responsible company?

Since its inception, Dolphin Energy has been a committed responsible corporate citizen across all its operations and activities and developed a strong commitment to social responsibility that focuses on the environment, culture and the arts, education, sports, and the community.

Does Botswana utilize solar energy?

Botswana has one of the highest levels of solar insolation in the world, but until recently, there were no reports of significant use of solar energy. However, as of September 2012, the first solar power generation plant in the country has been opened. The Botswana Renewable Energy Conference was held on 11-12 August 2014.

What is the energy situation like in Botswana?

Botswana's energy sector is a growing industry with significant potential. Almost all of Botswana's electricity is generated from coal. There are no identified petroleum reserves, and all petroleum products are imported and refined, primarily from South Africa. Botswana also has an extensive supply of woody biomass, ranging from 3 to 10 tons per hectare.

Is Botswana a good place to work?

Botswana is a fantastic place to work with a well-educated workforce and extremely friendly people. We are eager to provide an energy pathway that utilises Botswana's natural resources of gas and sunlight to empower the country.
