

What is a definitive budget?

The definitive budget is set in place during the project planning phase, by taking into account the totality of the agency's resources, including project teams and their time. Of course, even at this stage, the budget isn't set in stone, as it will be affected by internal and external changes at every step of the project execution.

What is a budget repository?

For any new project, you need a central repository that hosts all components of the budget, generates invoices, and allows stakeholders, accountants, and project managers to track budgets diligently and take corrective action when needed.

Is project budgeting limited outside of scale tier?

Project budgeting is limited outside of Scale tier. Teamwork was chosen for its versatility and abundance of collaboration features. The software allows you to seamlessly stay in contact with remote team members while still effectively tracking the budget of your projects. For more information, read our full Teamwork review.
