Burkina Faso's Ministry of Energy has commissioned Artelia to update its plan for the years 2020 to 2040, taking into account its ambitions in terms of rural electrification and supplying areas that are not yet connected or electrified.

To achieve universal electricity access goals, the country needs new grid-connected power generation capacities, decentralized power systems and a reorganization of the sector. It is in this sense that the DtP initiative wishes to support Burkina Faso. However, several sectoral challenges, highlighted in the table below, hinder these efforts.

As of September 2021, three private operators share the mobile market in Burkina Faso: Moov Africa, Telecel Faso SA, and Orange Burkina Faso SA. According to the last Q1 2021 report from ARCEP [1], there is currently a total of 23 466 416 active sim cards in country for a population estimated around 21 million persons. There is no restriction ...

Only 60% of the population in Ouagadougou, Burkina Faso, is connected to the SONABEL grid, leaving 40% of potential customers reliant on off-grid solutions. The demand for power is high, particularly during the hot season in February, March and April when households and institutions place a demand on electricity for cooling.

The extraconstitutional seizures of power undermined Burkina Faso's nascent and hard-earned democratically oriented political process, which had overcome the 27-year rule of Blaise Compaoré (who had himself come to power in a coup) after mass protests in 2014. Kaboré's subsequent election in 2015 was by far the most competitive Burkina ...

OUGADOUGOU, Burkina Faso (AP) -- The last three years have been tough for Fanta Charlotte Dabone, a mother of three from the conflict-battered West African country of Burkina Faso. Fanta Charlotte Dabone, a mother of three who fled her village after it was attacked by extremists, participates in Recreatrales, an international theater festival ...

Virtual Technologies and Solutions (VTS), an Internet Service Provider (ISP) based in the sovereign state of Burkina Faso in Africa, was launched in 2016 with a mission to deliver fast, reliable, and scalable internet connectivity across the region. VTS initially revolutionized internet access in Burkina Faso

Burkina Faso marks a significant leap in its renewable energy journey with the inauguration of the Zano photovoltaic solar power plant. With a peak capacity of 24 Megawatts, this state-of-the-art facility contributes 38 GWh of clean electricity annually, aligning with the nation's commitment to achieving 15% renewable energy by 2025.

Don't risk your time and money on an unknown, unproven tower construction vendor. We have built more than 5,000 wireless towers since 2001. ATC has an \$108.6 billion USD 1 market capitalization, with the people and processes needed to build, operate, and maintain towers over the long term.. Once your tower is built, it is managed to a strict standard ...
