

Burundi high power solutions

Why is Burundi launching a power generation master plan?

The project aims to support the development of a power generation master plan expected to highlight the various renewable energy options for Burundi in the 'power generation segment', paving the way for strong private sector participation which is critical for meeting the massive challenges of the power sector in the country.

Does Burundi have electricity?

Burundi's access to electricity (6%) is one of the lowest in Sub-Saharan Africa, even though the country's cost of generation (0.062 USD/kWh) is considered relatively low as compared to its neighboring countries.

What percentage of Burundians have access to electricity?

Only four percent of Burundians have access to electricity, marking one of the lowest energy access rates in the world. Demand for electricity is spiraling and is expected to grow from 46 megawatts (MW) in 2012 to 92 MW by 2018, reaching a high of 192 MW by 2025.

How much power does Burundi have?

Furthermore, Burundi has only 39 MW of installed capacity, of which 95% is hydropower-based, and significant renewable energy potential still to be tapped.

Is Burundi a conflict-affected state?

Burundi is classified as a fragile, conflict-affected state and has recovered from the decade-long conflict which took place between 1993 and 2003 and resulted in widespread destruction of economic and social infrastructure. Only four percent of Burundians have access to electricity, marking one of the lowest energy access rates in the world.
