Cee energy Madagascar

Which energy sources are used in Madagascar?

According to the energy inventory drawn up by the MEM 4 and the study report of the CREAM 5, wood energyhas the highest share (92%) in the total energy supply in Madagascar, followed by fossil fuel (7%). Only less than 1% of this demand is supplied by other renewable energy sources.

Which energy sources will be used in Madagascar by 2020?

For those purposes, it is expected that renewable energy, mainly including hydropower, occupies a share of 53% of the energetic mix of Madagascar by 2020. 3.4. Ocean energy The use of marine energies can be considered for Madagascar and particularly with OTEC, wave power and tidal barrages.

Why does Madagascar have a low rate of electricity?

Only less than 1% of this demand is supplied by other renewable energy sources. This high share of wood energy is explained by its accessibility and its low cost for the population. Madagascar has a low rate electricity access due to its high price and the insufficient quantity production. The national rate of electrification is only 4.7% only.

Does Madagascar have an energy transition?

Madagascar has not yet completed its demographic transitionand will have to ensure effective planning and management of its energy transition. The access to electricity is particularly dichotomous between rural region and main urban areas such as Antananarivo, Diego, Majunga.

Can marine energy be used in Madagascar?

The use of marine energies can be considered for Madagascarand particularly with OTEC, wave power and tidal barrages. The ocean current power or the tidal current turbines do not have potential for Madagascar . 3.4.1. Ocean thermal energy conversion (OTEC)

Does Madagascar have a high solar energy potential?

Due to its location, Madagascar has a high solar energy potential. As shown in Fig. 5, the Global horizontal irradiation is 2000 kWh/m 2. Almost all regions have more than 2800 h (350 sunny days) of annual solar radiation. In the west coast, solar radiation ranges from 4000 to 6500 kWh/m 2,.
