

Why is Central African Republic investing in electricity?

With an electrification rate of 35% in Bangui, 8% in the main provincial cities and towns, and only 2% in rural communes, the Central African Republic has invested in the energy sector as an engine of development to increase access to electricity and promote sustainable growth.

Is Central African Republic a landlocked country?

The Central African Republic is a landlocked country in Central Africa. Despite its significant mineral deposits and other resources, such as uranium reserves, crude oil, gold, diamonds, cobalt, lumber, and hydropower, as well as significant quantities of arable land, the Central African Republic is among the ten poorest countries in the world.

Where did the name Central African Republic come from?

The name of the Central African Republic is derived from the country's geographical location in the central region of Africa and its republican form of government. From 1976 to 1979, the country was known as the Central African Empire.

When did the Central African Republic become a democracy?

After gaining independence from France in 1960, the Central African Republic was ruled by a series of autocratic leaders, including an abortive attempt at a monarchy under the regime of Jean-Bedel Bokassa. By the 1990s, calls for democracy led to the first multi-party democratic elections in 1993.

What currency does the Central African Republic use?

The currency of the Central African Republic is the CFA franc, which is accepted across the former countries of French West Africa and trades at a fixed rate to the euro.

How does politics work in Central African Republic?

Politics in the Central African Republic formally take place in a framework of a presidential republic. In this system, the President is the head of state, with a Prime Minister as head of government. Executive power is exercised by the government. Legislative power is vested in both the government and parliament.
