

Energy has been pivotal to human development, from the steam engine to electricity. Today, with the fight against climate change at the centre of the global agenda, the energy transition seeks to diversify sources towards cleaner and more sustainable energies.

BUENOS AIRES, Dec 23 (IPS) - With large projects held back by the economic crisis and lack of infrastructure, Argentina seems to be looking at an alternative path towards a more ...

The implementation of these renewable energy projects will go a long way to help Argentina reach its NDC goal of reducing GHG emission to 37 percent by 2030. Ultimately, the program will contribute several environmental ...

The implementation of these renewable energy projects will go a long way to help Argentina reach its NDC goal of reducing GHG emission to 37 percent by 2030. Ultimately, the program will contribute several environmental co-benefits such as reduced air-pollution by reducing fossil fuel burning and a safer and more secure energy supply through ...

The Renewable Energy Solutions Mapping was focused on the implementation of decentralized and smaller-scale initiatives that can be replicated more easily in different communities, leveraging resources already available in nature. This ...

There are several ways in which clean energy innovation jobs and outputs are threatened by the Covid-19 pandemic. These include pressures on public and private budgets, a riskier environment for clean energy venture capital and disrupted global supply chains (see Chapter 2). Public R& D is expected to hold up better than private R& D, and there ...

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. ... Argentina: Energy intensity: how much energy does it ...

The Renewable Energy Solutions Mapping was focused on the implementation of decentralized and smaller-scale initiatives that can be replicated more easily in different communities, leveraging resources already available in nature. This document outlines the compiled findings by the Co_Lab, the Accelerator Lab of UNDP Argentina.

Energy has been pivotal to human development, from the steam engine to electricity. Today, with the fight against climate change at the centre of the global agenda, the ...

Energy Transition in Argentina 2020 Nationally Determined Contributions (NDCs) Action Plan for 2030 Outlook To ensure affordable, clean, reliable and sustainable energy supply, supporting ...

It declared 2017 the year of renewable energy and the Ministry of Energy launched an innovative renewable energy bidding program called RenovAr. Its target: to produce 20 percent of Argentina's electricity from ...

The World Bank Board of Directors approved three new projects for Argentina: a \$400 million project to expand access to clean energy and promote energy efficiency in vulnerable households and communities, a \$300 million loan to improve quality and coverage of health services, and a \$200 million project to reduce flood risks in cities around the ...

BUENOS AIRES, Dec 23 (IPS) - With large projects held back by the economic crisis and lack of infrastructure, Argentina seems to be looking at an alternative path towards a more sustainable energy mix involving small renewable energy projects, promoted by environmentally aware industries, businesses and private users.

Argentina has set a goal of establishing 20 percent renewable energy by 2025 and has committed to reducing carbon emissions by 30 percent by 2030. To meet these goals, the government, with support from the World Bank Group, has created a green energy market.

The World Bank Board of Directors approved three new projects for Argentina: a \$400 million project to expand access to clean energy and promote energy efficiency in vulnerable households and communities, a \$300 million loan to ...
