What is Eaton xstoragetm container C10 Bess?

The all-in-one Eaton xStorage™ Container C10 BESS is series of 10GP prefabricated containerized battery energy storage systems, composed of UL9540A approved lithium-ion battery strings, BMS, EMS, PCS, transformer, fire suppression system, and HAVC units.

What is containerized energy storage?

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are delivered in a single shipping container for simple installation on board any vessel. How does containerized energy storage work?

Why should you use multiple energy storage containers?

Multiple containers can be combined to create larger energy storage capacities, providing scalability based on the application energy requirements. This solution is ideal for retrofit installations, when dedicated battery room space is unavailable, and for semi-permanent installations.

What is the complete energy storage system (ESS)?

The complete energy storage system (ESS) comes with battery modules, battery monitoring system (BMS), cooling, TR exhaust, and firefighting and detection system. The "Plug and Play battery room" simplifies integration into any system integrator's power management system on board a ship.

What is a containerized maritime energy storage solution?

ABB's containerized maritime energy storage solution is a complete, fireproof self-contained battery solution for a large-scale marine energy storage.

How does a maritime energy storage system work?

The maritime energy storage system stores energy when demand is low, and delivers it back when demand increases, enhancing the performance of the vessel's power plant. The flow of energy is controlled by ABB's dynamic Energy Storage Control System.
