

Where is Corre energy's CAES facility located?

The CAES facility in Ahaus, situated in North Rhine-Westphalia, is strategically located between growing offshore wind power production in the north and major power consumption areas in the south. The first phase of the Ahaus project will utilise two of the site's four existing salt caverns to implement Corre Energy's multiday CAES technology.

Where is Corre Energy's flagship CAES project 'ZW1' located?

Corre Energy's flagship CAES project 'ZW1' is strategically located in north-eastern Netherlands. The project has secured co-financing from the Connecting Europe Facility and is an approved Project of Common Interest (PCI).

How does Corre energy support the transition to net-zero?

To read more: [Cookie Policy](#) Corre Energy is supporting the transition to net-zero by developing and commercialising Long Duration Energy Storage projects and products.

How did Corre energy secure the Ahaus site?

Corre Energy secured the Ahaus site through an agreement with Solvay, a global chemical company, in June 2023. Ahaus is close to the country's future national hydrogen backbone grid, H2-Startnetz, and will support the development of a regional, industrial-scale, renewable green hydrogen value chain.

Does Eneco have a partnership with Corre energy Germany?

LichtBlick, Eneco's German subsidiary and a green energy supplier, will co-develop, finance and operate the Ahaus project with Corre Energy Germany. The agreement significantly reduces the risks for Corre Energy in achieving a commercial close and final investment decision.

The Northern Mariana Islands, officially the Commonwealth of the Northern Mariana Islands (CNMI), [b] [11] is an unincorporated territory and commonwealth of the United States consisting of 14 islands in the northwestern Pacific Ocean. [12] The CNMI includes the 14 northernmost islands in the Mariana Archipelago; the southernmost island, Guam is a U.S. territory.
