

# Curaçao ways of storing electricity

How will a battery energy storage system benefit Curaçao?

The implementation of a Battery Energy Storage System will allow Curaçao to collect energy from renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored energy can be released to mitigate the intermittency of wind power and ensure grid stability.

Will W&#228;rtil&#228; supply the Caribbean island of Curaçao with a battery energy storage system?

WILLEMSTAD, Curaçao, May 20, 2024 (GLOBE NEWSWIRE) -- Technology group W&#228;rtil&#228; will supply the Caribbean island of Curaçao with a 25 MW /25 MWh Battery Energy Storage System (BESS).

How much electricity does Curaçao produce?

Unlike most countries in the world, Curaçao generates about 34 percent of the current electricity production through wind and solar energy. In the Netherlands, that is merely 6 percent. Engineer Richenel Bulbaai from Curaçao defended his dissertation on this subject on 11 October 2019 at the University of Twente.

Will Aqualectra revolutionize energy management in Curaçao by 2030?

As a part of Aqualectra's ongoing efforts to continue improving its services and better serve the people of Curaçao, this agreement aims to fully revolutionize energy management in Curaçao by 2030, ensuring reliable, affordable, and sustainable energy for the island.

What is the voltage used in Curaçao?

On Curaçao, two voltage levels are in use: 127 and 220 Volts. The voltage level can vary by region, city, or sometimes even hotel. Your electric devices typically operate at 120 Volts in Canada. So please check the local voltage before using your devices! If the local voltage is much higher at 220 Volts, you need a voltage converter.

Who is putting a Bess order in Curacao?

The order was placed by Aqualectra, Curacao's government owned utilities company, and will be booked by W&#228;rtil&#228; in Q2, 2024. The BESS and the GEMS Digital Energy Platform will provide grid stability and reliability, reduce unserved energy and help mitigate the risk of brownouts and blackouts.

The implementation of a Battery Energy Storage System will allow Curaçao to collect energy from renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored ...

renewable sources such as wind and solar energy and store it using advanced battery storage technologies. This stored energy can be released to mitigate the intermittency of wind power and ensure grid stability.

Aqualectra and W&#228;rtsil&#228; have taken a significant step towards a sustainable energy future for Cura&#231;ao by the signing of a battery energy storage system agreement. The landmark agreement aims to relook energy management in Cura&#231;ao by 2030 and ensure reliable, affordable and sustainable energy for the island.

Technology group W&#228;rtsil&#228; will supply the Caribbean island of CuraC`ao with a 25 MW / 25 MWh Battery Energy Storage System (BESS). The system will enable the expansion of renewable energy capacity and the reduction of carbon emissions, representing an important step towards a sustainable energy future for the island.
