

Who is Lahti Energia CEO?

"In 2020 I joined Lahti Energia as CEO," Haikarainen tells us. "I started in the energy industry and it has interested me ever since." Lahti Energy prides itself on providing CO₂-free energy on a mass scale. In 2020, the company commissioned a biomass boiler that has enabled Lahti Energy to provide CO₂-free heat to the city.

Does Lahti energy provide sustainable district heating in Finland?

Providing sustainable district heating in Finland, we speak to Jouni Haikarainen, CEO of Lahti Energy, about the company's progressively green mission for carbon neutrality. Europe is a leading continental player in the global sustainability sphere.

What makes Lahti Energia unique?

The condensate cleaning process developed by Lahti Energia is unique in Finland. The Kymi II gasification plant is the world's first gasification power plant using only recycled fuel. It is unique: there is no equivalent anywhere else in the world.

Who can visit Lahti Energy Ltd?

Lahti Energy Ltd accepts limited groups of professional visitors, e.g. media representatives, politicians and other decision-makers as well as energy professionals. Before the visit, visitors should conduct an online safety briefing. The list of visitors must be submitted to Lahti Region in advance.

How did Kymi II help Lahti Energy?

Kymi II helped reduce Lahti Energy's carbon dioxide emissions by about one third.

Will Lahti be a good take-off?

Lahti has a lot of expertise for a good take-off in that direction. The war started by Russia in Ukraine is accelerating the green transition, as Europe in particular wants to get rid of Russian fossil energy.

OmaWatti on Lahti Energian asiointipalvelu, jossa voit seurata energiankulutustasi, pöytäkirjasi, asiakastietojasi ja tarkastella laskujasi. OmaWattista löydät myös verkkopalvelu- ja loppusuorituspalvelun ja voit ottaa yhteyttä asiakaspalveluumme.

Lahti Energy and Nordic Ren-Gas have signed a preliminary agreement for the design of the plant. Once realised, the plant will become the largest hydrogen economy cluster in Finland. Its renewable fuel production could replace up to 50 million litres of diesel. The positive climate impacts of the plant are twofold: renewable fuels replace ...

The Lahti Energy group invests in eco-efficiency and renewable forms of energy. Since the old Kymijärvi, the coal power plant was closed and the Kymijärvi III biomass-fired plant was introduced. The homes in the area are now warmed with biofuels and recycled fuel.
