

Will Czechia reach its solar potential?

As Czechia reaches its solar potential, with impending changes to the country's legislative landscape ushering in greater utility-scale solar array rollouts, over 5,000 attendees - government ministers, industry experts, and key business stakeholders - descended on Prague this week for the 2023 Smart Energy Forum.

Who is ZPA smart energy?

We manufacture complex electrical engineering products with an innovative approach to modern technology. 70 years of supplying measuring and control equipment to the global power industry market, 70 years of development, 70 years of experience! All this is reflected in the quality of ZPA Smart Energy products. We keep moving onward!

How much solar power does the Czech Republic have in 2022?

As the central European nation clocked in 2,627 MW of installed solar PV capacity at the end of 2022 - which is 426 MW up from the previous year, according to estimates published by the International Renewable Energy Agency (IRENA) - the Czech Republic's continued achievement of these solar gains was on the lips of most attendees.

Is the solar industry booming in Czech Republic?

Czech Environment Minister Petr Hladik said that the solar industry is currently experiencing a huge boom. However, he dashed hopes for the country only pursuing PV by stating that its generating capacity would be a mix of renewables and nuclear. There are six commercial reactors generating roughly one-third of the landlocked country's electricity.

Will solar power ever eclipse nuclear power in Czechia?

Robert Sedmera, a sales representative for Austrian PV manufacturer Fronius, told pv magazine that the company has operated in Czechia since 1991. He said he does not believe the country's solar capabilities would ever eclipse nuclear, but noted that the public appetite is leaning more towards solar and cheaper electricity prices.

News | Vodafone Announces Two Smart Energy Initiatives | Pipeline Publishing Google Alert - Czechia
Posted on November 26, 2024 by In Czechia, Vodafone is developing a software-based system that can supply grid providers with spare capacity from the backup batteries housed ...

ZPA Smart Energy is a leading Czech manufacturer of electricity meters and load control devices. Thanks to acquired knowledge, modern development centre and conscientious partners, they are able to produce products according to the specific needs of clients.
