

Deon energy Myanmar

What services does Deon energy provide?

We provide automated services to regularly update you on the effectiveness and production of your installation. Deon Energy offers innovative renewable energy solutions including photovoltaic PV systems, energy storage, hybrid systems, net-metering, and retrofit-repowering projects.

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Will increasing imports help ease the electricity supply shortages in Myanmar?

While increasing imports could help to ease the electricity supply shortages in Myanmar, it remains challenging under the current circumstances. Improving power sector financial viability and recovering customer confidence are critical for private sector capital mobilization to enhance the quality of electricity services.

Is there a reliable assessment of current and future electricity demand in Myanmar?

Currently, there is no robust and credible assessment of current and future electricity demand in Myanmar.

Is Myanmar's power sector affected by political and macroeconomic instability?

Myanmar's power sector has been severely affected by political and macroeconomic instability since the February 2021 military takeover. Following the significant uncertainty and volatility that characterized much of 2022, economic conditions appear to have stabilized in the first half of 2023.

Does Myanmar export natural gas to China & Thailand?

On Myanmar's fiscal year basis (from April to March), the value of natural gas export to China and Thailand increased from US\$3,240 million (MMK 6,804 billion equivalent) in FY2022 to US\$3,975 million (MMK 8,34 billion equivalent) in FY2023.

Myanmar: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Myanmar, an energy rich country, benefits from large, apparently proven, reserves of oil and natural gas - the U.S. Energy Information Administration estimates its proven oil and gas reserves as 50 million barrels of oil and 10 trillion cubic feet of gas. The Myanmar Ministry of Energy (MOE), on behalf of the Myanmar Government,
