

# Do you charge for electricity if photovoltaic panels are installed for free

Can you get free solar panels on a roof?

Companies offered to pay to lease your roof from you for 20-25 years and, in exchange, would install and maintain solar PV panels on it. You didn't have to pay upfront for the panels, and would also benefit from the free electricity produced by the system. But there are very few free solar panel schemes available now.

Do you have to buy energy if you have solar panels?

While they may be costly to set up in the first place, you'll eventually break even thanks to reduced energy bills - and you'll make money on all the solar energy you don't use, by selling it back to the grid. But if you have solar panels, do you still have to buy energy? You will, for the simple reason that it isn't sunny every day of the year.

What if I don't use my solar panels?

If your solar panels produce electricity you don't use - as the great majority of panels do - you can sign up to a Smart Export Guarantee (SEG) tariff and sell your excess solar energy back to the grid.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

How much solar energy does a solar installation use?

Even with one of the best solar batteries, you'll typically only use 80% of the solar energy produced by your panels - and your break-even point will be about a decade more. It's important to also take into account how to finance your solar installation as it will impact when you break even.

Can solar panels cover my electricity bill?

With enough solar panels and batteries, it's possible to cover your entire electricity bill, but it's not cost-effective. What's the average electricity bill with solar panels in the UK? The average electricity bill for a three-bedroom household with a 3.5 kWp system is £163,236 per year.

Yes, you'll still have an electric bill before and after your solar panels are installed and producing clean energy. However, the balance due on your monthly bills will be much lower - or even negative - because your solar ...
