

How many solar power plants did Czechia build in 2023?

Czechia built around 1 GW of new PV plants in 2023, according to data from the Czech Solar Association (Solární Asociace). In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022.

How many solar power plants are in Czechia?

A total of 82,799 solar power plants were connected to the grid in Czechia last year. Image: CEZ Group
Czechia recorded a significant increase in installed solar capacity last year, with about 970 MWp of capacity added to the grid. However, the growth was mainly driven by household rooftop solar, according to the Czech Solar Association.

Why is the solar market growing in Czechia?

The figures mark a period of rapid growth in Czechia's solar market. The growth has been largely driven by residential PV, with most of the new installations (80,069) being domestic PV plants, supported by the country investing an additional CZK 55 billion (\$2.5 billion) in its New Green Savings program back in March 2023.

Does Czechia have a solar boom?

Finally, Czechia is also experiencing a second solar boom, with the total added PV capacity in 2023 surpassing 1 GW, marking Czechia's return to the GW-market stage after 13 years. The country, having experienced a solar boom in the past, was one of the first significant PV markets in Europe.

Does Czechia need more energy storage capacity in 2023?

Czechia registered strong PV capacity growth in 2023, driven by a surge in residential installations. The nation's PV association says it expects a shift toward larger power plants in the coming year, but notes the need for more energy storage capacity.

What does the Czech section of Eurosolar do?

The Czech section of EUROSOLAR contributes to various internet discussions in order to position itself clearly against nuclear power and for renewable energies (approx. in 40 cases). The section criticised a ministerial proposal on climate and energy which set a target for renewable electricity of only one percent by 2030.

Of the new solar power plants, 80,069 (96.7%) were from household rooftops, with a total output of 823.3 MWp. The average size of domestic PV plants was 10.3 kWp last year, up from 6.7 kWp in 2022. 92% of families chose a solution combined with battery storage with an average capacity of 12 kWh, up from 11.7 kWh in 2022.

Econ solar Czechia

Czechia GDP is estimated to be \$594 billion dollars by World Economics for 2023 - 15% larger than official estimates. The official estimate for Czechia's GDP published by the World Bank was \$519 billion at the end of 2023 in purchasing power parity terms..
