Why are South Korea's EV batteries so popular?

In addition, to compete with the Chinese rivals, South Korean battery makers are also working on producing lithium iron phosphate (LFP) batteries, which are in higher demand due to their lower cost. LFP batteries are cheaper and more sustainable than the nickel-cobalt-manganese (NCM) batteries, which are the most common in EVs.

What makes EKT a good battery company?

EKT has a state-of-the-art manufacturing facility and R&D center to ensure that our lithium batteries, lithium battery modules, and lithium battery systems are always of the highest quality during development, manufacturing, and testing.

Who makes the most EV batteries in the world?

Chinese producers CATL and BYD dominate the global battery industry with a combined market share of 53.2 per cent, according to South Korea-based consultancy SNE Research. Their production and sales are still concentrated in its domestic market, where EV adoption has been much greater than in western countries.

Does EKT offer a cloud-based service?

EKT can offer cloud-based services thanks to the implementation of telematics and a mobile phone APP (Lithium Partner). When it comes to the components, you can precisely check each battery system's details from the EKT database. Haven't Found The Right Forklift Battery Yet?
