

Does Eritrea have a solar farm?

Eritrea is lagging far behind in the electrification of its territory and is now turning to renewable energy. The government has launched the country's first solar farm, a 30-MW facility 30 km from the capital, Asmara.

Where can I find information about energy in Eritrea?

You can find information on energy production, total primary energy supply, electricity consumption, and CO₂ emissions for Eritrea on the IEA homepage. For data on energy access (access to electricity, access to clean cooking, renewable energy, and energy efficiency) in Eritrea, visit the Tracking SDG7 homepage.

How is electricity generated in Eritrea?

Eritrea's NDCs were developed in 2018. The majority of electricity generated in the country is from imported fossil fuels. In 2019, the electrification rate in rural areas of Eritrea was only 37%, compared to 76% in urban areas. Some projects financed by international donors are aimed at increasing these rates.

What are Eritrea's Nationally Determined Contributions (NDCs)?

This project, located in Dekemhare, southeast of Asmara, is part of Eritrea's Nationally Determined Contributions (NDCs), pledges that embody efforts by all parties to the Paris Agreement to reduce their national emissions and adapt to the impacts of climate change. Eritrea's NDCs were developed in 2018.

One of the world's poorest countries needs a major oil find to help kick-start its economy. In additional content for subscribers to electronic editions, African Energy looks at some economic and political issues in Ethiopia and Eritrea, and provides an update on oil exploration blocks in the fractured state of Somalia and its territories.

Eritrea: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
