Equatorial Guinea: The oil and gas that drives the Equatoguinean economy comes from three main fields: Alba, Ceiba and Zafiro, all of which are located offshore. National output stood at just 5,000 barrels a day (b/d) in 1995 but quickly increased once the country's first big find, the Zafiro Field, was developed with the use of a floating ...

A great deal of political party activity ensued when Equatorial Guinea attained autonomy from Spain in 1963. Bubi and Fernandino parties on the island preferred separation from R&#237;o Muni or a loose federation. Ethnically based parties in R&#237;o Muni favored independence for a united country comprising Bioko and R&#237;o Muni, an approach that was adopted. The Movement for the Self ...

Equatorial Guinea - Culture, Traditions, Music: Despite a veneer of Spanish culture and of Roman Catholic religion that is thicker in Bioko than on the mainland, many Equatorial Guineans live according to ancient customs, which have undergone a revival since independence. Among the Fang of the mainland, witchcraft, traditional music (in which the ...

Juan Lupercio Nsibi Omogo, Director General of Sociedad El&#233;ctrica de Guinea Ecuatorial (SEGESA), talks to ECP about targeting enhanced energy security in Equatorial Guinea, as power demand is expected to grow by 10 ...

Food and drink in Equatorial Guinea . The food of Equatorial Guinea has much in common with the dishes found in West and Central Africa. Similarities include: widespread (and liberal) use of pimento, the mixing of meat and fish in the same dish, the use of groundnuts or ground pumpkin seeds, and the prevalence of shrimps, prawns and river crayfish (whether dried, smoked or ...

Equatorial Guinea has experienced rapid economic growth due to the discovery of large offshore petroleum reserves, and in the last decade has become sub-Saharan Africa's third largest oil exporter. Despite the country's economic windfall from oil production, resulting in a massive increase in government revenue in recent years, there have been few improvements in the ...

Strom aus Wind und Sonne f&#228;hrt nicht unbedingt dann an, wenn er gebraucht wird. Je gr&#246;sser der Anteil dieser erneuerbaren Energien wird, desto mehr f&#228;hrt diese Tatsache ins Gewicht. Um Stromproduktion und -nachfrage ins Gleichgewicht zu bringen, braucht es deshalb Stromspeicher. Diese nehmen &#252;bersch&#252;ssigen Strom aus Wind und Sonne auf und geben ihn ...

Laut Energy Vault erlaubt ein 120 Meter hoher Turm die Speicherung von 35 MWh an elektrischer Energie. Damit liessen sich 2000 bis 3000 Wohnungen f&#252;r acht Stunden mit Strom versorgen. Die Kosten ...

Das APX-Batteriesystem verwendet eine kobaltfreie LiFePO<sub>4</sub>-Chemie und einen vierstufigen Schutz durch BMS, modulare Energieoptimierung, Sicherung und Aerosol, um seine erh&#246;hte Sicherheit, Zuverl&#228;ssigkeit und lange Lebensdauer zu gew&#228;hrleisten.

Weil der Strom aus erneuerbaren Energien unregelm&#228;ssig anf&#228;hrt, brauche es effiziente Energiespeicher, ... Beim sogenannten Energy Vault handelt es sich um einen bis zu 120 Meter hohen Turm „aus tonnenschweren Betonkl&#246;tzen und riesigen Kr&#228;nen“, schreibt H&#246;llrigl. &#220;bersch&#252;ssige Energie wird dazu verwendet, diese Kl&#246;tze in die H&#246;he ...
