Is fervo a geothermal company?

HOUSTON, February 29, 2024 -- (BUSINESS WIRE)-- Fervo Energy ("Fervo"), the leader in next-generation geothermal development, today announced that it has raised \$244 million in new funding led by Devon Energy, a pioneer in shale oil and gas.

Who is fervo energy?

Fervo Energy is an energy resource company focused on harnessing heat through enhanced geothermal systems (EGS). It was co-founded in 2017 by Tim Latimer, a mechanical engineer who worked as a drilling engineer at BHP until 2015.

How does fervo energy work?

Fervo Energy is expanding the bounds of where geothermal plants can be built--and what they can do. Geothermal power plants work by circulating water through hot rock deep underground, then converting that heat energy into electricity at the surface.

Will fervo energy's field results work at commercial scale?

If Fervo Energy's field results work at commercial scale, it could become cheaper and easier to green the grid. Fervo's enhanced geothermal demonstration site in northern Nevada. Alastair Wiper/Courtesy of Fervo Energy
In late January, a geothermal power startup began conducting an experiment deep below the desert floor of northern Nevada.

How has fervo changed the oil and gas industry?

Fervo has adapted innovations pioneered by the oil and gas industry, such as horizontal drilling and distributed fiber optic sensing, to make reservoirs of hot rock that exist beneath the earth's surface into practical, economically viable, clean sources of energy.

Will fervo make geothermal as important as solar and wind?

Fervo is poised to make geothermal as important as solar and wind to our energy future." Other new investors included Canada Pension Plan Investment Board (CPP Investments), Liberty Energy, Macquarie, Grantham Foundation for the Protection of the Environment, Impact Science Ventures, and Prelude Ventures.
