Suva, Fiji, October 21, 2020- A landmark agreement between Energy Fiji Limited (EFL) and IFC to deliver the largest solar project of its kind in the Pacific to date has been hailed a transformative step that will take the island nation closer to its goal of sourcing 100 percent of its energy needs from renewable sources.

Energy Resources in Fiji" under the "Fiji Renewable Energy Power Project (FREPP1)"; implemented by Department of Energy (DoE), Govt. of Fiji with financial and technical support from United Nations Development Programme (UNDP)-Global Environment Facility (GEF).

Increased energy demand and the continued role of fossil fuels in the energy system mean emissions could continue rising through 2025-35. Emissions have not yet peaked, and global CO 2 emissions from combustion and industrial processes are projected to increase until around 2025 under all our bottom-up scenarios. The scenarios begin to diverge toward ...

energy demand in Fiji will be mainly driven by economic growth and is unlikely to grow by more than 3 % p.a. for the next 5 years. The most critical exposures of Fiji"s ... Fiji"s geothermal resources have been first studied in the 60ies, the global energy crisis in the 80ies triggered further investigations. The most recent report issued by
