

What is the power system of Finland?

The power system of Finland consists of power plants, the main grid, high-voltage distribution networks, other distribution networks, and electricity consumers. Finland is part of the Nordic synchronous area along with Sweden, Norway and eastern Denmark. Finland is also connected to Estonia by HVDC transmission links.

How many power plants are there in Finland?

the number of power plants in Finland. In Finland, there are approximately 120 energy companies producing electricity and about 400 power plants, more than half of which are hydroelectric power plants. Finland's electricity generation is fairly distributed compared with many other European countries.

Does Finland have a nuclear power plant?

As part of the energy transition Finland has been replacing electricity generation from fossil fuels with nuclear power and renewables. Wind power in particular has grown to be a significant part of electricity generation. A fifth nuclear reactor, Olkiluoto 3 was commissioned in 2023 and increased nuclear power generation by over 50%.

Which power stations are located in Finland?

The following page lists all the power stations located in Finland. /60.3712353; 26.3470924 (Loviisa Nuclear Power Plant, Unit 1) /60.3703866; 26.3463843 (Loviisa Nuclear Power Plant, Unit 2) /61.2369104; 21.445806 (Olkiluoto Nuclear Power Plant, Unit 1) /61.2359708; 21.4424586 (Olkiluoto Nuclear Power Plant, Unit 2)

How much wind power does Finland have?

By the end of 2022, Finland's wind power capacity reached 5,677 MW with 1,393 turbines installed. That year, wind power production increased by 41% to 11.6 TWh, representing 14.1% of the country's electricity consumption. This growth positioned wind power as the country's third largest electricity source.

Does Finland have a hydro power plant?

However, Finland's mountains are relatively low, which restricts the amount of electricity which can be generated from hydro power. Vattenfall's nine hydro power plants in central Finland and the Ostrobothnia region, which generate a total of 124 MW of electricity, are monitored and controlled from a central control room in Porvoo (Borg&#229;).
