

Gabon energy vault tower

What is Energy Vault?

Energy Vault is a global energy storage company specializing in gravity and kinetic energy based, long-duration energy storage products. Energy Vault's primary product is a gravity battery to store energy by stacking heavy blocks made of composite material into a structure, capturing potential energy in the elevation gain of the blocks.

Will Energy Vault transform tall buildings into 'Big batteries'?

In May 2024, Energy Vault, a company specializing in grid-scale energy storage, announced a global partnership with Skidmore, Owings & Merrill (SOM) to transform tall buildings and superstructures into 'big batteries' using the technology called gravity energy storage systems (GESS).

What if Som & Energy Vault had a superstructure tower?

SOM and Energy Vault's superstructure tower, which could range from 300 to 1,000 meters (985 to 3,300 feet) in height, would have hollowed out structures resembling elevator shafts for moving the blocks, leaving room for residential and commercial tenants.

What is an energy vault tower?

An Energy Vault tower in "discharge" mode, generating electricity to deliver back to the grid. Source: Energy Vault In addition to supplying a flexible reserve of energy to compensate for the intermittency of renewables, the towers have the potential to provide other important ancillary services to maintain grid stability and reliability.

Does Energy Vault have a gravitational energy storage tower?

Energy Vault secured \$100 million in Series C funding for its EVx tower, which stores gravitational potential energy for grid dispatch. The EVx energy storage tower lifts composite blocks with electric motors. Image: Energy Vault Energy Vault, maker of the EVx gravitational energy storage tower, has secured \$100 million in series C funding.

Who are Som & Energy Vault?

Architecture firm SOM and Energy Vault are developing gravity energy storage solutions for skyscrapers and other buildings.

Energy Vault Holdings, a developer of sustainable grid-scale energy storage solutions, and Carbosulcis, a coal mining company owned by the Autonomous Region of Sardinia, Italy, plan to develop a 100 MW hybrid gravity energy storage system (GESS) for underground mines, pairing their modular gravity storage and batteries.
