

Georgia renew solar solutions

Does Georgia Power have a simple solar program?

Since January 2017, Georgia Power's Green Energy program has been replaced by the Simple Solar Program. This program allows customers to support and foster the growth of solar energy in Georgia by having Georgia Power purchase and retire Renewable Energy Credits (RECs) generated from solar energy resources on their behalf.

Does Georgia Power Company offer a solar extension program?

The Public Service Commission Order pertaining to Dockets 4822, 16573, and 19279 states that Georgia Power Company is to provide existing solar participants the option to extend the term of their current Distributed or Utility Scale generation for up to 35 years. Please select from the following options for more information surrounding your program.

What is Georgia Power's Advanced Solar Initiative (ASI)?

Georgia Power's Advanced Solar Initiative (ASI) is a program initiated in 2012 to procure up to 210 Megawatts (MW) of renewable resources through a combination of Utility Scale and Distributed Generation (DG) Request For Proposals (RFPs) and application processes.

Is it beneficial to go solar in Georgia?

Going solar in Georgia is a great choice for those looking for an efficient and cost-effective way to reduce their carbon footprints*. From the moment you contact Alternative Energy Southeast, Inc.*, we will be a one-stop shop for your solar panel installation and energy storage needs from start to spectacular finish.*

Does Georgia Power offer a green energy program?

Georgia Power is directed by the Commission to file a proposed Green Energy Program that would allow customers to purchase green energy at an established price. This program would not impact the bills of customers who choose not to participate.

Are solar panels a good investment in Georgia?

Solar panels can be a good investment for homeowners and business owners in Georgia as they help in reducing monthly utility bills and potentially increasing property values. For those who are looking for an efficient and cost-effective way to reduce their carbon footprints, going solar in Georgia is a great choice.

The Center also works with companies that are identifying and implementing technologies in the field. With the Center, energy industry, and academia working in tandem, Georgia has become one of the leading states in biomass production and solar energy generation. Another promising renewable energy source comes from waste-to-energy conversion.
