

Green leaf solar Moldova

Why should Moldova invest in a solar park?

Chiril Gaburici, the Minister of Economy and Infrastructure is very enthusiastic about the project: "This solar park is an important milestone for Moldova's energy sector. It reduces our dependency on imported energy. Furthermore, the production of green energy is a clear commitment to the environment."

How many solar power plants are there in Moldova?

According to the Ministry of Moldova in the whole country there are currently 52 PV-power plants of different sizes with a total capacity of 2.93 MW, which means this new solar park in Bacioi village makes a significant contribution to the increasing green energy supply.

Should Moldova develop renewable electricity?

Developing renewable electricity would not only help Moldova achieve its National Energy Strategy and increase the country's energy security, but would also bring significant socioeconomic and environmental benefits.

What is the system integration of renewables for Moldova?

To provide Moldovan policymakers at all levels with a vision towards a clean, secure and modern electricity system, the International Energy Agency today launched a policy roadmap on System Integration of Renewables for Moldova.

When you factor in government incentives and tax breaks, along with the increased value of your house, you'll find that solar panels will start saving you money sooner than you thought possible. Contact us today for a free quote!

We hold ourselves, our products, and partners to exact standards at all stages of the process. Each project is completed with the sole goal of customer satisfaction.

Solar modules/panels absorb sunlight and convert it into D/C (direct current electricity). 2. The electricity is then routed to an Inverter which then converts the D/C power to A/C power. This conversion is necessary because the power being fed from your utility grid is also A/C power, and you will be sending power back to the grid so it must ...

By 2050, the Republic of Moldova has set itself the target that greenhouse gas emissions will be fully offset by the absorption of greenhouse gases. Renewable energy will thus help mitigate global warming.
