

Guam id energy group

Who is ID Energy Group?

ID Energy Group is a second-generation family company founded in 2008 that is specialised in the photovoltaic energy sector.

Who is ID Energy Group self-consumption?

ID Energy Group Self-Consumption Photovoltaic self-consumption has countless advantages for companies that want to produce and use energy more efficiently. We know this thanks to our extensive knowledge of the sector. We are one of the highly specialised teams that make up the ID Energy Group.

How is energy consumed in Guam?

In Guam, the consumption of energy is heavily influenced by its remote location. Almost all energy is reliant on imports of petroleum products for use in transport and electricity. Guam does not have any domestic production of conventional fuels such as oil, natural gas, or coal.

What makes ID Energy Group unique?

In addition to a renewed image, ID Energy Group upholds its commitment to make a positive contribution to society and the planet through the sustainability inherent to its activity, and reaffirms its values: expertise, agility, flexibility, honesty, improvement, and innovation.

How much power does Guam generate?

Guam has a rated generating capacity of 560 MW, more than twice its historical highest load. This power is supplied by several plants burning residual fuel oil operated for the Guam Power Authority by independent power providers. In 2015, electricity in Guam cost 2.5 times as much as on the U.S. mainland.

Who owns ID Energy Group's share capital?

Pangram Capital, a venture capital firm managed by Spain-based Quadriga Asset Managers SGIIC, and Portugal's Growth Partners Capital, will invest the amount in several phases, acquiring a 10% stake in ID Energy Group's share capital.

Today, ID Energy -- a company specialising in photovoltaic energy -- has presented its new brand image that aims to strengthen the company at a global level. With the ...

The pattern of energy production and use in Guam is shaped by its location, a remote island. Almost all energy is reliant on imports of petroleum products for use in transport and electricity. Guam has no domestic production of conventional fuels such as oil, natural gas or coal.
