Batterlution Balcony Power Plant Battery Storage is a plug-and-play system that uses LiFePO4 batteries to store excess solar energy from your balcony solar panels. It has dual built-in MPPT controllers and a maximum 800W limited programmable DC output.

The BSLBATT Balcony Solar PV Storage System is an all-in-one design that supports up to 2000W of PV output, so you can charge it with up to four 500W solar panels. In addition, this leading microinverter supports 800W of grid-connected output and 1200W of off-grid output, providing your home with reliable power during power outages.

18KW On-grid solar system in Guatemala. At the beginning of 2022, we were approached by a client in Guatemala who told us about the local electricity situation in Guatemala. In 2021, the price of electricity in Guatemala has risen by around 2% to 2.5%. The client therefore sought a customised solar power system for his house.

With 8 PV modules of 410W each, a balcony battery storage of 5kWh, and an 800W micro inverter, the system can produce about 8kWh of electricity per day, achieving both demand shift and self-use of solar power.

Balcony Energy Storage Systems offer a powerful solution for those looking to achieve energy independence. By generating and storing your own energy, you can reduce your reliance on the grid, lower your electricity
