WASHINGTON, JUNE 6, 2024 - The World Bank's Board of Executive Directors approved a \$35 million grant to enable solar power generation and increase access to electricity in Guinea ...

Guinea-Bissau: Solar Energy Scale-up and Access Project (P174576) May 27, 2021 Page 5 of 13 al u se o y operational performance, the average cost of electricity service has been reduced from US\$0.60 to US\$0.42 per kWh. Despite this progress, the average electricity tariff (US\$0.38 per kWh) does not recover costs yet. According to the West

Learn about the World Bank's \$35 million grant to Guinea-Bissau for a solar energy project aimed at enhancing electricity access and sustainability through solar power generation and infrastructure development.

The World Bank, IDA, ESMAP, and GCF are funding Guinea-Bissau's first solar power plants with a \$78.15 million investment to support decarbonization and expand electricity access. The project will build solar plants near Bissau and install mini-grids on the Bijagós islands, thereby providing electricity to 1,200 households and SMEs.

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Under the Solar Energy and Access to Electricity Development Project, the World Bank will assist

Guinea-Bissau price of solar panels inia

Guinea-Bissau until 2030 and has already approved a USD \$30 million grant. Additionally, the International Development Association (IDA), a World Bank subsidiary, will contribute \$35 million, and the Energy Sector Management Assistance Program ...
