

He Yuwei State Grid

Does the State Grid Corporation of China promote new energy accommodation?

Based on the State Grid Corporation of China's development of new energy and its accommodation patterns,the mechanisms of new energy accommodation,and the continuous 'double-decline' effect in recent years,this article analyses a series of measures adopted by State Grid Corporation of China to promote new energy accommodationin China.

Why is China building a UHV power grid?

State Grid is also building a world-leading set of ultrahigh-voltage AC lines,to help eastern China's regional AC grids absorb the output from those massive lines. "The UHV AC power grid is like a deep-water port,and the UHV DC is like a 10,000-ton ship.

How has the East China power grid changed over the years?

The scale of the East China Power Grid's grid-integrated new energy has increased by more than 200%since 2015 and has experienced an annual growth rate of 50%. In the event of rapid development,the full accommodation has been maintained in the East China Power Grid.

What is China's State Grid?

China's State Grid,one of the country's two grid operators,proposed the technology to the government in 2004 to connect the country's hydro and coal power stations with the economic hubs that gobbled electricity hundreds of miles away.

Is China's UHV grid better than the rest of the world?

Gregory Reed, a DC transmission expert who runs the University of Pittsburgh's Center for Energy, says China's UHV grid puts it far ahead of the rest of the world. "They're investing significantly, and they've gone right to the highest levels of technology capability from day one. There's no comparison anywhere else in the world.

How many power grids does the SGCC have?

Divided by geographic area,the operation area of the SGCC comprises sixlarge regional power grids: the Northwest China,Southwest China,Northeast China,North China,Central China,and East China branches.

Liu Zhenya, the then head of China"s State Grid and dubbed by the Chinese media as the "father of UHV power lines", envisioned a future where a mega grid would end ...
