

Homemade Solar Tube Bracket

How to Mount DIY solar panels?

Before you mount your DIY solar panels, you first need to join them into arrays. You can mount solar panels on the roof of your house, on poles, or on the ground of your home, although many people prefer mounting them on rooftops because they appear more beautiful and tap more sunlight on the roof.

How do I build a DIY solar panel stand?

The first step when building your DIY solar panel stand is to determine the proper angle for your panels. This will depend on your location and the amount of sunlight your panels will receive. Once you have this information, you can begin designing your stands and gathering the necessary materials.
