

Hong Kong power reducer box

What type of power outlet does Hong Kong use?

Hong Kong uses power outlets and plugs of types G & D. Take a look at the pictures below to see what these plugs and power sockets look like: Doesn't look familiar? Do the outlets look different in your country? You'll need a power plug adapter. Be careful!

Do I need a travel adapter in Hong Kong?

Hong Kong uses electrical outlets and power plugs of types G & D (see images). If your country uses the same electrical outlets and power plugs, you don't need a travel adapter. Are the electrical outlets and power plugs in your country different? Then you will need a travel adapter.

What is the standard voltage for a power socket in Hong Kong?

All power sockets in Hong Kong provide a standard voltage of 220V with a standard frequency of 50Hz. You can use all your equipment in Hong Kong if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia.

Do I need a voltage converter in Hong Kong?

The voltage used in Hong Kong is 220V and the frequency is 50Hz. If this is the same in your own country, you don't need a voltage converter when travelling to Hong Kong. If the voltage and/or frequency in your country is different, you should check if your devices are dual voltage.

How reliable is HK Electric?

HK Electric has been achieving a supply reliability of over 99.999% of a world-class standard maintained since 1997.

Does a laptop charger work in Hong Kong?

In Hong Kong, the standard voltage is 220V and the standard frequency is 50Hz. Most laptop chargers are designed to be compatible with a range of voltages (dual voltage), so they should work with outlets in Hong Kong without any issues.
