

Is Hoppecke a good battery?

HOPPECKE offers energy storage solutions as lead-acid- or nickel-cadmium industrial battery systems in almost any application where critical backup DC energy is needed. Having ISO 9001,14001,IEC,DIN,TUV,DNVGL and many other international standards and certifications,Hoppecke is one of the highest quality batteries on the market today.

Who manufactures Hoppecke batteries?

Hoppecke batteries are manufactured by Hoppecke. M50 Power Solutions is the official Irish agent for these batteries,which are typically used for industrial purposes including heavy machinery,motive powered vehicles and aviation appliances.

What is a Hoppecke energy system?

Full-Service models and technical system management. Energy systems consist of perfectly coordinated energy storage devices and added-value generating components. The core element,which is typical for an energy system,is the project and engineering serviceof HOPPECKE,which makes a system both customer-oriented and of higher quality.

How to contact Hoppecke Batterien?

HOPPECKE Batteries is the largest producer of industry battery systems in European ownership. Since 1927, the family company has been developing and producing in Germany, and thanks to its leading research and development activities, it has all reliable and innovative storage technologies in its product portfolio. TAB.

The AGM series power HC has been one of HOPPECKE's top sellers for many years when it comes to presenting a high-current solution with operational reliability. Innovative detailed solutions, such as the use of plastic-moulded ...

In dieser Welt, in der alles elektrisch wird, ist HOPPECKE Ihr Lösungspartner für eine nachhaltige und technologieunabhängige Energieversorgung. Denn unsere Kunden haben die Wahl: Ob Blei-Säure, Nickel-Faserstruktur (FNC®) oder Lithium-Ionen. HOPPECKE hat alle relevanten Speichertechnologien im Portfolio.

For this demanding mode of operation, HOPPECKE offers lead-acid batteries in OpzS, OpzV and AGM design, which have been tried and tested over many years and are classified according to the battery photovoltaic standard IEC 61427. Each design has its own individual strengths and is suitable depending in the requested conditions.

In the event of peak loads, the batteries supply the power required, maintaining the mains voltage and thus
