

From proven electrification solutions to a focused R& D vision for evolving from fossil fuels to renewables, ABB can help electrify the path forward for your renewable energy installations. With over 100 years of expertise and proven product innovations, ABB is the name to lead you into the future of sustainability.

The opportunities to decarbonize industry are wide-ranging and include high-efficiency powertrains for industrial applications like pumps, fans, conveyors and machine tools; electrification of heavy-duty vehicles and material-handling systems; emissions monitoring; helping data centers be less power-hungry; and carbon capture and storage.

The opportunities to decarbonize industry are wide-ranging and include high-efficiency powertrains for industrial applications like pumps, fans, conveyors and machine tools; electrification of heavy-duty vehicles and material-handling ...

ABB and its long-time channel partner Contro-Net Kft (Contro-Net), a Hungary-based engineering services company came together to provide a cost-effective, fully integrated solution for ESAB's dry and wet powder mixing facilities in Mor, Hungary.

Transforming the built environment with smart building technologies and renewable energy integration is key to cleaner, greener communities and slowing climate change. ABB's broad portfolio of solutions addresses some of the ...

ABB Ability(TM)Energy Management with integrated by-product gas network o assists gas dispatching, calculates optimal power production based on real-time data and adapted to power market o optimizes energy consumption and secures energy availability considering steam yield, consumption of by-product gases, energy purchase and production

From proven electrification solutions to a focused R& D vision for evolving from fossil fuels to renewables, ABB can help electrify the path forward for your renewable energy installations. With over 100 years of expertise and proven ...

Energy management software; Energy storage modules (medium voltage) Engineering and consulting; Explosion protective components (low voltage) Extensions, upgrades and retrofits; F. Fault current limiting (medium voltage) Feeder protection and control; Fieldbus

Hungary abb energy industries

Transforming the built environment with smart building technologies and renewable energy integration is key to cleaner, greener communities and slowing climate change. ABB's broad portfolio of solutions addresses some of the sector's ...

ABB will celebrate 30 years of operation in Hungary in October 2021. ABB has always approached its business in a sustainable way, balancing the needs of society, the environment, and the economy. That is why ABB Hungary will mark this special milestone by planting 1,000 saplings to reinforce its commitment to reducing carbon emissions.

This week we hear more about his role at ABB and where he draws inspiration from. At the start of our Summer Series we heard from Brandon Spencer, now the President of ABB Energy Industries, about the future of process automation technology.
