India shenzhen eybond co ltd

Eybond Industrial control computer (hereinafter referred to as "industrial computer") and solar converter customized software, the software connects the slave device in the local area network through IEC104 protocol (master station), and establishes the local data logger link. Establish data transmission network with Eybond cloud and the third ...

Support Wi Fi, GPRS,4G, NB-IOT and other communication modes; Support RS-232, RS-485 serial port to communicate with device; Compatible with multi brand and multi type equipment (inverter, combiner box, environmental monitor, ammeter, etc.)

Eybond has rich experience in monitoring the energy IOT industry. You only need to raise the demand and leave the rest to us. At the same time, we have rich software products related to energy IOT industry. ... Building 10, Zhiheng Sicense & Technology Park, Nanshan District, Shenzhen, China +86-755-89992588. Solutions. WeChat. ShineMonitor.

Stick series pluggable datalogger can support GPRS and Wi Fi. With the advantages of IP65 protection level, simple installation, strong anti-interference ability,it is no need to configure power supply and antenna; it can support the remote control, remote debugging, remote upgrading and other functions of the device, and can view the working status and power generation of the ...

Eybond has a deep photovoltaic background and rich experience in the Internet of things industry. It cooperates with inverter manufacturers to develop photovoltaic intelligent operation and maintenance solutions for different occasions. ... Nanshan District, Shenzhen, China +86-755-89992588. Solutions. WeChat. ShineMonitor.

Shenzhen Eybond Co., Ltd, is a professional engaged in the Iot, technology research product development and lineIndustry application of the national high-tech wood enterprises In the process of rapid development, the company insists on model innovation.

Eybond is committed to the energy industry, developed by itself can be compatible with a variety of types of different brands of data collector and powerful control can treasure energy management system. Related equipment for real-time monitoring and control of the energy industry, has realized the remote online monitoring of energy equipment ...

Gridbox is a device to prevent the electric energy from photovoltaic system from feeding into the public grid. It connects with the inverter through RS-485, uploads the data to the cloud server through wireless networks such as Wi-Fi, GPRS, 4G, etc. it can monitor the data of power generation, power consumption, power purchase in real time, support remote monitoring, set ...

India shenzhen eybond co ltd

Eybond provide customers with diversified and multi scenario IOT terminal equipment to protect your IOT communication. According to the needs of customers, we will build a reliable, independent, secure and private software system through private cloud deployment solutions. ... Nanshan District, Shenzhen, China +86-755-89992588. Solutions ...

Shinemonitor System, based on the back-end server products of Eybond IOT cloud, provides users with application services such as power station management, equipment data acquisition, analysis, calculation, storage, alarm push, power station on-site video monitoring, etc. through advanced computing such as cloud computing, big data, intelligent sensor, etc. for the needs ...

Using pile networking technology and mobile Internet technology to provide safe and convenient charging service for electric vehicle users, provide convenient and reliable operation management for charging pile manufacturers and charging facilities operators, build an ecological sharing charging service platform for different types of charging pile owners, realize "Internet + ...

Shenzhen Eybond Co., Ltd, founded in 2014, is a high-tech enterprise specializing in solar PV system integration and monitoring, smart energy management and service. We have by far served more than 1000 EPC customers, solar plant owners And installers etc in all over the world.

Shenzhen Eybond Co., Ltd, is a professional engaged in the Iot, technology research product development and lineIndustry application of the national high-tech wood enterprises In the process of rapid development, the company ...

Smartmeter series are intelligent terminal products of smart grid. It can support single-phase and three-phase modes. Equipped with standard RS-485 communication interface, it can be used with data logger to realize remote monitoring of data.

NEMonitor System, based on the back-end server products of Eybond IOT cloud, provides users with application services such as data collection, analysis, calculation, storage, alarm push, peak cutting and valley filling, energy-saving strategy, etc. of energy storage device through cloud computing, big data, intelligent sensor and other advanced ...

Plug Pro Series pluggable data logger can support Wi-Fi, GPRS, 4G, NB-IOT and other communication modes. Through DB9, aviation joint, RJ-45 and other connection modes, it is perfectly compatible with inverter, energy storage machine, environmental monitor and other device of various brands.
