How much energy does Iran use in 2021?

Iran's economy consumed an estimated 11.6 quadrillion British thermal units of primary energy in 2021, making it the highest energy consumer in the Middle East.

What type of energy is used in Iran?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Iran: How much of the country's energy comes from nuclear power?

Could 1m household solar power plants be set up in Iran?

56 Tehran Times, 'There is possibility to set up 1m household solar power plants in country', August 19, 2022; Fitch Solutions, Iran Power Report, Q4 2022; page 11.

Is Iran making a 'dramatic' leap to produce near-bomb-grade fuel?

Iran Makes 'Dramatic' Leap to Produce Near-Bomb-Grade Fuel, but to What End? The United Nations chief inspector says production has quadrupled. But it is not clear whether Iran is trying to touch off a crisis or gather bargaining chips for negotiations with the United States.

How much oil does Iran have in 2021?

At the end of 2021, Iran accounted for 24% of oil reserves in the Middle East and 12% in the world (Figure 1). 2 Despite its abundant reserves, Iran's crude oil production has fallen since 2017 because the oil sector has been subject to underinvestment and international sanctions for several years.

How does Iran's economy compare with other Middle Eastern countries?

Iran's economy is relatively diversified compared with many other Middle Eastern countries, but petroleum and other liquids exports are a significant source of government revenue. In 2021, Iran's oil companies earned about \$40 billion in net oil export revenues, up from around \$15 billion in 2020.

According to Mohammadi, about \$80 billion has already been invested in the petrochemical industry so far, and total investments in the program will reach \$85 billion by 2027. ...
