**Fermentation Products** We provide an array of enzymes that facilitate the breakdown of complex substances into simpler compounds, aiding in the conversion of raw materials into desired products such as biofuels, alcoholic beverages, pharmaceuticals, and organic acids. Enzymes help optimize fermentation by enhancing yields, improving product quality, and reducing ...

**Food & Nutrition** Food processing enzymes are used as food additives to modify food properties like digestibility, texture and shelf life. Other enzymes used in the food industry are for starch liquefaction, saccharification and isomerization reaction. Enzymes play a key role in milk production, cheese making, baking, wine making, juice making, brewing etc.

**Animal Feed Products** Supplementing the feed with specific enzymes improves the nutritional value of feed ingredients, increasing the efficiency of digestion. Feed enzymes help break down anti-nutritional factors like phytate, fibers etc. that can otherwise lead to reduce meat, egg, milk production. These enzymes also help to maintain gut health of the animals and also
