

How will aspire and rise help the Maldives' energy transition?

World Bank-financed projects ASPIRE and ARISE support the Maldives' energy transition by installing more than 53.5 megawatts of solar capacity and 50-megawatt hours of battery storage. This will reduce Maldives' annual import bill by about \$30 million, with a project lifetime saving of \$756 million over 25 years.

What can we learn from the Maldivian energy project?

The project in the Maldives explores the potential of other renewable energy sources like wind and hydrogen, as well as new technologies such as EV charging stations and vehicle-to-grid technologies. We can learn from these efforts to expand the use of renewable energy and innovative technologies in the Maldivian energy sector.

How will aspire solar projects benefit Maldives?

In general, the projects will benefit the people of Maldives and the government by lowering electricity prices and providing quasi-budgetary support. 2014 - The first 1.5 megawatt (MW) solar project under ASPIRE had four investors' bids, resulting in a high PPA of 21 US cents per unit of electricity.

How can Maldives develop a sustainable health sector?

Towards An Ecologically Sustainable Health Sector At the core of Maldives development policy is low carbon growth, environmentally sustainable and resilient smart health-care services, and addressing factors affecting environmental health.

Why is the Maldives moving away from fossil fuels?

The Maldives is transitioning to renewable energy sources to reduce their carbon footprint significantly. In doing so, they will be shifting away from fossil fuels. "The World Bank has been adjusting its program to respond quickly to the threats posed by the COVID-19 pandemic while focusing to bolster economic recovery and resilience.

How has aspire impacted the Maldives economy in 2022?

2022 - ASPIRE has resulted in the mobilization of about \$28.3 million for 17.5 MW PV installations. Maldives' dependence on tourism and fossil fuel imports makes its economy particularly vulnerable to external shocks. In 2020, when COVID-19 hit, real Gross Domestic Product (GDP) contracted by at least 34 percent.
