

Leader de la production d'énergie photovoltaïque en Outre-mer depuis 2006, Albioma déploie cette activité dans l'Océan Indien et notamment à Mayotte, un territoire non connecté aux réseaux continentaux.

Solar energy is the only renewable energy with significant development potential on the island; the wind potential (22 MW according to a study) would not lead to a significant production because the wind blows only 6 months per year.

French renewable power producer and developer Akuo has officially opened a 1.2-MW solar park equipped with an integrated energy storage facility on the island of Mayotte in the Indian Ocean.

Featuring Lithium-ion batteries, the plant's storage mechanism stabilizes the grid by smoothing out solar production and injecting stored energy during peak demand, facilitating Mayotte's transition to a more stable and renewable energy grid.

Mayotte is a land of contrast: there are many challenges but nature offers us everything we need to develop great, local, and sustainable projects. The solutions developed by Akuo, such as agrivoltaics and energy storage, are fully adapted to the island's challenges.

Albioma has been the leading producer of photovoltaic energy in Overseas France since 2006; the Group is rolling out this business in the Indian Ocean, and specifically Mayotte, a territory not connected to continental electricity networks.

Le producteur d'énergie renouvelable Akuo a inauguré la centrale photovoltaïque avec stockage de Hamaha sur l'île de Mayotte. Le site valorise une ancienne décharge qui a
