In this context, the RECIF project [15] was launched in 2018 with the objective of studying and implementing a smart micro-grid that couples a hydrogen chain (electrolyzer + storage + fuel cell) with a thermochemical unit in the tropical insular region of French Polynesia. The thermochemical unit is designed to recover waste heat from the ...

Brando" in French Polynesia, has an SMA hybrid system in continuous operation since December 2018. The two main challenges in the project were the interface to the existing devices (re-powering character) and the integration of the new feature "Black start" into the customers infrastructure to energize the island's transformers solely

Solar energy systems need to be highly efficient in order to maximize power generation from available sunlight. Our solar solutions offer market-leading performance at high voltages while reducing system complexity and size, helping you lower costs and increase output.

Micro Inverters Lean on Allegro's reputation for reliability to withstand extreme temperatures, humidity and dust, prolonging the lifetime of your rooftop microinverter. Our small, and integrated solutions improve power density, ...
