The cabinets are sized to enable mounting of all inverters and charge controllers in the same panel. This makes the installation much safer, whilst keeping all equipment out of sight and protected from the elements. The cabinets are made of aluminium, making them easy to position and providing a long service life.

The question I have is about how they will install our system. We have a large 13.14kW system and will use two inverters to avoid clipping. Our installation also includes one battery cabinet with 6 cells. Is it possible to connect two inverters to one battery cabinet? I read that you can connect one inverter to two cabinets.

What is a Mobile Inverter? Mobile inverters are like regular inverters. They convert direct current into AC for domestic use. All the household appliances work on AC but the power generated from the Solar Panels is DC. To convert this power to AC Solar inverters or Mobile inverters are used. The primary application is to convert current but Mobile Inverters have a secondary ...
