OverviewHistoryMoixa Smart BatteryGridShare SoftwarePrevious productsAwardsMoixa is a British cleantech company that develops software and hardware to optimise use of renewable energy. They produce smart batteries that are paired with residential solar panels. The company also designs "GridShare" Software which optimises battery systems, and can also be used to create virtual power plants (VPP) with other batteries, as in the work they do in Japan with ITOCH...

The £10.8 million Smart Island project will demonstrate how solar power, batteries, smart heating technologies and electric vehicles (EVs) can work together to support the islands' energy system, alleviate fuel poverty and ...

The Smart Energy Islands (SEI) project, part financed by £8.6 million from the European Regional Development Fund, will lay the foundations for the wider Smart Islands programme, which aims to cut electricity bills by 40%, meet 40% of energy demand through renewables, and see 40% of vehicles being electric or low-carbon.

The Smart Energy Islands (SEI) project, part financed by £8.6 million from the European Regional Development Fund, will lay the foundations for the wider Smart Islands programme, which aims to cut electricity bills by ...
