

Why is Moldova imposing a state of emergency?

More than half the world's population sees AP journalism every day. Moldova's parliament has voted in favor of imposing a state of emergency in the energy sector over fears that Russia could leave the European Union candidate country without sufficient natural gas supplies this winter.

Does Moldova have a good energy sector?

Moldova is also on the right path to developing a sound institutional structure in the energy sector, informed by better statistical data. The National Bureau of Statistics (NBS) is commended for its efforts to improve energy data collection and reporting.

What are the sources of electricity and gas imports in Moldova?

The sources of electricity and gas imports are not diversified and crucially depend on gas supply from Russia and electricity supply from the Moldavskaya GRES power station, which operates beyond the control of the Moldovan government.

How does Moldova get natural gas?

However, Moldova still procures natural gas almost exclusively from Gazprom through the traditional route from Ukraine: the Iasi-Ungheni-Chisinau pipeline remains mostly idle, and the Trans-Balkan reverse flow has not yet resulted in any significant flow to Moldova.

Who owns Kuciurgan power plant in Moldova?

Russian energy giant Gazprom supplies the gas-operated Kuciurgan plant, which generates electricity that powers a significant portion of Moldova proper. The plant was privatized in 2004 by Transnistrian officials and later sold to a Russian state-owned company. Moldova doesn't recognize the privatization.

What is Moldova's long-term goal in the electricity sector?

In the electricity sector, Moldova's long-term objective was to fully interconnect with the European Network of Transmission System Operators for Electricity (ENTSO-E). This was achieved significantly earlier than planned, due to Russia's invasion of Ukraine in late February 2022.

Goal 7 Targets. 7.1 By 2030, ensure universal access to affordable, reliable and modern energy services. 7.2 By 2030, increase substantially the share of renewable energy in the global energy mix. 7.3 By 2030, double the global rate of improvement in energy efficiency. 7.A By 2030, enhance international cooperation to facilitate access to clean energy research and ...

The Republic of Moldova is at a critical juncture on its path toward European integration, with the environment, energy, and climate change being key areas in this process. Aligning with European standards is not just a bureaucratic ...

To make the best use of increased available import capacity and secure higher electricity imports from Continental Europe to Ukraine and Moldova during the upcoming winter, several national, regional, and EU-wide measures have been recommended by the Energy Community Secretariat in its recently published Energy Market Observatory report.

Decision-makers, key actors from the energy sector, development partners, local public authorities, and representatives of civil society gathered on 27 May at a national conference to discuss the potential for implementing energy communities in the Republic of Moldova and to provide legislative recommendations and proposals for public policies to apply ...
