

Nepal sofarsolar battery

What is a sofarsolar battery system?

SOFARSOLAR's newest high-voltage battery system consists of up to four 48 V LiFePO₄ battery modules, and one battery distribution unit. The battery capacity can easily be expanded through the system's modular, stackable design. In combination with click-to-connect cables, installation is both fast and user-friendly.

How many battery modules does sofarsolar have?

SofarSolar's high-voltage battery system consists of 1 to 6 BTS 5K battery modules, and a 1-phase ESI 3...6K-S1 hybrid inverter. Up to six units can be connected in parallel, enabling a configuration of up to 36 kW and 180 kWh. Smart Energy Management The battery modules come with an integrated battery management system and power control unit.

How does a Sofar powerall work?

The SOFAR PowerALL can intelligently adjust the output voltage and current of the battery according to the battery's SOC. This leads to an increase in the available energy capacity. Modular The battery capacity can easily be expanded through the system's modular, stackable design.
