

New Energy Photovoltaic Panel Purchase Contract

What is a solar power purchase agreement?

What is a power purchase agreement? A solar power purchase agreement is a financing arrangement that allows businesses, government agencies and educational institutions to purchase solar electricity with no upfront capital cost. You rent your roof and buy the discounted solar electricity rather than investing in a solar PV system of your own.

What is a PV installation agreement?

The Installation Agreement is a lump-sum agreement between the project company, as owner of the project, and the installation contractor, the contractor that will be responsible for installing the PV system, providing the balance of plant and commissioning the plant.

Should you buy or rent a solar PV system?

You rent your roof and buy the discounted solar electricity rather than investing in a solar PV system of your own. A PPA offers an effective means to reaping the benefits of solar PV without having to take on the responsibilities of being a solar system owner-operator.

What is a power purchase agreement (PPA)?

A Power Purchase Agreement (PPA) refers to a contractual agreement between two parties, typically a power producer and a customer. The producer usually arranges the design, gains the necessary permissions and manages the installation of a solar PV system on the customer's property at little to no cost.

What happens when a solar PV contract ends?

When the contracts come to an end the customer can choose to remove the system, extend the PPA or purchase the energy system. On-site solar PV generation can take the form of either a large-scale rooftop installation on a commercial or industrial (C&I) site, or a ground-mount installation on adjacent land.

How much does it cost to install solar panels?

Purchasing and installing solar panels can be quite costly, especially if you're planning to use them to power your entire business. Commercial solar panel systems cost anything from £15,000 to £60,000 for small to medium-sized businesses, while larger solar setups would require an even greater investment.
