

New Zealand spark solar home systems

How much does solar power cost in New Zealand?

According to the Electricity Authority, the average size of a residential solar power system installed in New Zealand today is 4.4 kW, which would cost roughly \$12,600*fully installed. A 4.4 kW solar power system would include 10 or 11 solar panels (depending on the size of the panels) and a 4 kW or 5 kW inverter. Is Solar Power Worth It?

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

Does green spark solar supply solar power?

We also supply solar power for dairy farms, and other commercial and industrial applications. Green Spark Solar Ltd is a member of SEANZ, the Sustainable Energy Association of New Zealand. We are also a fully accredited Tesla Powerwall Installer. What are the benefits of solar power?

Are solar panels a good investment in New Zealand?

A solar power system in New Zealand can easily earn a 10 to 15% return on investment. But this rate of return is likely to increase each year as the price of electricity continues to climb. Unsure if solar panels on your roof will be worthwhile or if the upfront cost will lead to a good payback?

Who is green spark solar?

Green Spark Solar Ltd is a member of SEANZ, the Sustainable Energy Association of New Zealand. We are also a fully accredited Tesla Powerwall Installer. What are the benefits of solar power? Solar Power is a top investment, with a rate of return well above bank deposits or even borrowing costs. Best of all it is tax free. It is fun.

Do solar panels need to be certified in New Zealand?

All panels and electrical work (including battery systems) need to comply with and be certified to New Zealand electrical standards. Installing solar panels can be a more cost effective and sustainable way to provide electricity for your home.

A PV system may give a small enhancement to your property value. Does location matter? The amount of electricity generated by a PV system will obviously be greatest in areas that receive more sunshine hours. New Zealand's sunshine hours range from about 1,400-2,600 annually - NIWA provides a solar intensity map for the whole of NZ.
