Will Indonesia & Singapore develop a floating solar farm in Batam?

Indonesia and Singapore will begin the joint development of a floating solar farm in Batam next year with a goal of generating around 2 GW of electricity that will be transported to Singapore via undersea cables.

How will Batam's solar export initiative impact Indonesia?

Several companies have already invested in Batam to establish facilities for producing solar cells and modules. This solar export initiative is expected to bring added value, create jobs, and support the development of Indonesia's solar industry.

Why should Indonesia invest in the Batam PV project?

The Batam PV project will not only offer competitive pricing but will also make Singapore's power tariffs stable and predictable. For Indonesia, it means increased investment." Indonesia now relies mainly on affordable fossil fuel to generate electricity.
