

4 ???· Oman still sees a bright future for green hydrogen and plans to become a major supplier, despite a number of projects to produce or import the fuel in other countries being delayed or scrapped.

Opec giant United Arab Emirates has committed \$30 billion of finance to Alterra, a newly launched private investment vehicle, focused on climate change in emerging markets ...

4 ???· With a focus on environmental stewardship and long-term prosperity, OQAE ensures the delivery of sustainable solutions to meet Oman's evolving industrial energy needs", stated Ms. Najla Zuhair ...

Dr Sultan Al Jaber, chairman of Alterra and Cop28 president, says the fund was created to meet the urgency of the moment by seizing the opportunity of green industrialisation and climate action. Photo Show more

Opec giant United Arab Emirates has committed \$30 billion of finance to Alterra, a newly launched private investment vehicle, focused on climate change in emerging markets and developing...

Alterra Energy works in advanced recycling technology within the waste management and petrochemical industries. The company converts discarded plastics into their original building blocks, which can be used to produce new plastics and other products. Alterra serves sectors for sustainability and reliance on fossil fuels, including the solid ...

The Fund benefits from ALTERRA's push to significantly expand private finance and fuel ambitious new climate strategies, as well as Brookfield's global leadership in clean energy and transition investing, building on over three decades of operational experience in renewable energy technologies and its track record as the world's largest ...

"Ravago's equity investment supports Alterra's continued efforts to accelerate the adoption of advanced recycling," said Frederic Schmuck, CEO of Alterra. "We are pleased to be able to partner with Ravago in offering our petrochemical and chemical clients integrated solutions for hard-to-recycle plastics at the end of their first life."

This strategic partnership combines Ravago's expertise in the mechanical preparation of plastic waste, Alterra's proprietary liquefaction technology, and Neste's expertise in the processing of hydrocarbons. Neste and Ravago are aiming for a first industrial chemical recycling site in North Sea Port in Vlissingen with an annual processing ...

During the tour, Rep. Sykes met with Alterra's leadership and workers to learn more about their efforts to turn... Meet Jeremy, One of America's Change Makers. by Ivy Decker | Feb 15, 2023 | News. Meet Jeremy:

Oman alterra energy

President, Alterra Jeremy became one of the first employees at Alterra so he could make a difference.

What does Alterra produce? Alterra has developed a liquefaction technology that, unlike many of its competitors, is a continuous, rather than a batch or semi-batch process. The technology produces pyrolysis oil: "At scale, our facility in Ohio is commercial," said Fred.

Join The Solution Be Part of Our Team. We have some of the brightest minds in engineering, operations, and strategy on our team. We are accelerating our partners' sustainability capabilities using cutting edge technology that assists in achieving the global imperative of plastic reuse in order to clean the planet. That takes a multi-disciplinary team of innovators and thought ...

Plans to develop 2GW renewable energy in S. Korea. Everen. 7GW clean energy project pipeline in India. NEOEN. 8GW wind and solar portfolio and 20GW pipeline. E360S. Innovating new circular economy practices. OnPath Energy. Building 4GW project base in solar, wind, battery storage

Omar Terrie is Alterra's Head of Public Affairs where he manages the company's government relations, community relations, and communication programs. Prior to Alterra, Omar was the Federal Public Affairs Manager for Neste's Renewable Polymer and Chemicals business unit where he lead Neste's public and government affairs efforts on ...

Alterra's disruptive technology breaks down hard-to-recycle plastics and converts them back into materials that can be used to make new plastic. By doing this, Jeremy and his team are reducing the need for fossil resources to make new plastics and creating value for used plastics that might otherwise end up going to waste.

We're a climate capital catalyst, financing the transition to a net-zero, climate-resilient economy. Born from the vision of COP28, Alterra is the world's largest private climate investment fund. We bring unprecedented scale to address humanity's most urgent challenge.
