Pakistan flagsol gmbh

Flagsol is a subsidiary of Solar Millennium, one of the world leading project developers for large-scale solar thermal power plants. This promising technology is truly sustainable, as the sun's energy is harvested. Suitable for units larger than 50 MW, our plants generate heat from focussing the sunlight with parabolic mirrors.

Starting in 2005 and co-funded by the German Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU), Flagsol developed a collector with improved optical efficiency and significantly lower costs than standard collectors.
