

Can alternative energy sources solve Pakistan's energy crisis?

In this context, the adoption of alternative energy sources presents a compelling solution to address Pakistan's energy crisis. Pakistan's energy crisis is a long-standing and multifaceted issue that has significantly impeded the country's economic growth and development.

Who is LTI ReEnergy cleantech?

LTI ReEnergy CleanTech GmbH is a leading German automation company group founded 50 years ago and has started to be active in the renewable sector in wind energy since 1999 and solar energy since 2007.

What are the key features of Pakistan's future energy system?

A key feature of Pakistan's future energy system is the huge increase in demand across all energy sectors, particularly for desalinated water, which is almost 19% of the final energy demand. This share of energy for desalination is among the highest in the world.

What is Pakistan's energy crisis?

Pakistan's energy crisis is a long-standing and multifaceted issue that has significantly impeded the country's economic growth and development. Pakistan witnessed acute energy crisis during the summer months from May-August 2023.

Why is Pakistan reducing energy security & economic growth?

Nevertheless, high dependence on imported fossil fuels, construction of controversial hydropower projects and increased dependence on outdated coal technology is not only reducing energy security, but also creating a significant headwind to economic growth. Figure 1 shows the current power generation mix of Pakistan for the year 2018.

Which data was used to assess the energy potential of Pakistan?

Real weather data was used for the assessment of the energy potential, and solar PV, wind energy and hydropower potentials were derived based on [65,71,76]. Pakistan's wind and solar resource maps are provided in the Figures S39 and S40, Supporting Information. Biomass and waste resources were categorised into solid residues and solid wastes.
